

Derby Car (get started)

1

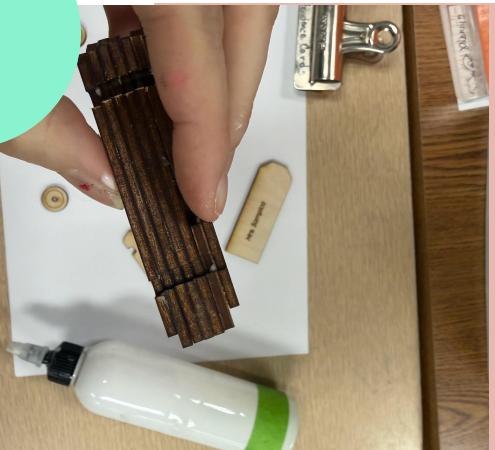

Gather your supplies
-glue (blue cabinet)
-derby car parts
-paper towel
-optional clip

2

Glue the 5 largest pieces together with a very thin layer of glue. Use a paper towel to spread it. Keep the Axle channel clear

3

Add the two smaller, non-end pieces (your end pieces will have your design. Keep the axle channel clear.

Derby Car (the body)

4

Glue the designed side pieces to your car. Keep the axle channel clear and straight. (this technique is called LAMINATION).

5

Glue the chassis (bottom of car) to your laminated car body. To do this you should add a thin layer of glue to the laminated body and keep the channels clear.

6

Clamp together and let it dry up a bit. After it has dried sand it smooth.

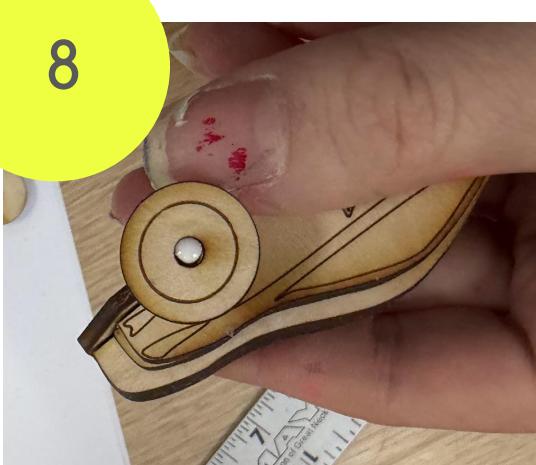

Derby Car (axle and finish)

7

Mark just shy of $1\frac{1}{2}$ inches.
This is the length of an
axle.

8

Cut the other axle the same size
and place in the axel channel
before glueing (light on the glue)
on the wheels. Once wheels are
on straight, place hubcaps on.

9

Color your car with
acrylic markers or
acrylic paint.
